### Logo Project

My favorite part of the semester was learning about the Mayan and Babylonian numbers. It's interesting to see the differences in symbols. Everyone has seen that the ones place symbols in the Babylonian numbers look like martini glasses. I wanted to incorporate that into my logo. I started by drawing the martini glass. It took me a while to decide what I wanted to do with the tens place symbol. I wanted it to fit in with the martini glass. That's when I thought that it kind of looks like a mouth. When I first drew my logo, it was backwards. I had the martini glass first. I realized my mistake after I had drawn the mouth, so I flipped the paper over and redrew it properly on the back. I'm happy with my logo.
