

Faculty Salary CUPA Comparisons Data Tables

Salaries Reported in Fall 2004

OFFICE OF INSTITUTIONAL RESEARCH

May 2005

Fall 2004 NKU Faculty Salaries Compared To Fall 2004 Published CUPA Data

In the fall 2004 Northern Kentucky University was among 813 four-year colleges and universities that participated in the National Faculty Salary Survey conducted annually by the College and University Personnel Association (CUPA). Included in this year's survey are 720 schools that also participated in fall 2003. Participating schools are in the Carnegie Foundation's classifications of Bachelor's, Master's, and Doctoral institutions along with a small number of specialized schools. Not among the CUPA participants are research universities.

CUPA publishes the national data for all participants. The national report presents data for all reporting institutions, for all private institutions, and for all public institutions. Additional breakouts for public institutions group schools with collective bargaining contracts and those without.

This summary draws from the data for all public institutions and reflects the salaries of 124,995 faculty. CUPA collects the following aggregate salary data on faculty in each discipline that is part of the survey. These data elements apply to each academic rank from instructor through full professor. Lecturers and visiting faculty are excluded. The elements are: minimum salary, maximum salary, average salary, and number of people reported. No data related to years in rank or to gender are reported. Only faculty for whom teaching/research account for more than 50 percent of their duties are reported. Stipends are excluded from the salary data. And, department chairs and other twelve month faculty are not included.

The report for fall 2004 includes data for 330 public institutions of which 184 (56%) are Master's level schools. Of the total public schools, 219 (66%) do not have collective bargaining agreements. This percentage has been reasonably consistent over the years.

In a comparison of data among schools participating in both the 2003 and 2004, surveys CUPA reports an average increase of 3.1% at all public institutions. At Master's level universities the average is 3.0%. Northern Kentucky University shows an increase of 1.6%.

Northern's percentage increase from CUPA data, however, is not a good reflection of the actual percentage change in the University's faculty salaries. Between fall 2003 and fall 2004, NKU had a shift of the mix among the tenure track academic ranks reported to CUPA. The percentage of full and associate professors declined while the percentage of assistant professors increased, not an unexpected change with the growth in the number of new tenure track positions. Nationally, the percentage of faculty in each tenure track rank is essentially stable across the two years. A better descriptor for Northern

Kentucky University is the 3.0 % increase shown in AAUP data. That figure compares salaries of the same people across the two years.

The fall 2004 data show that the University's nine-month faculty salaries, excluding faculty in the Chase College of Law are at 96% of the CUPA average.

CUPA uses federal Classification of Instructional Program (CIP) codes to categorize faculty disciplines. CUPA has opened up its report process to accepting data on any of the 332 disciplines covered by CIP codes at the four digit level. While this new collection practice allows for a greater level of specificity, it also means for some disciplines a rather comparatively small number of faculty and institutions in the national counts.

The survey began collecting salary data on law faculty only in 1998. Chase College of Law faculty, therefore, are not part of the University averages in this report. Since the beginning of CUPA benchmarking on faculty salaries in 1989, NKU's use of CUPA data has focused on faculty in the colleges with undergraduate and graduate programs. Tables 18 - 20, nonetheless, present Chase College of Law salaries in comparison with the published data for 36 participating institutions that reported law school salaries on 907 faculty. From the list of participating institutions in the CUPA report's appendix, there is no way to determine which reported law salaries and which have ABA accreditation. Similarly, CUPA does not provide a means to identify any disciplines or schools that have specific programs accredited.

Although data reported to CUPA does not include faculty in developmental disciplines who hold the lecturer rank, since the beginning of NKU's CUPA benchmarking, internal reports have included those faculty with comparisons to the instructor's rank in their respective academic disciplines. They appear in the overall University tables.

Three basic tables comprise each section of the report. These tables repeat with aggregate University data and in individual sections with data for each college. There is an additional section for developmental programs. Each table presents data by academic rank within CIP discipline. The first table shows the average faculty salary by rank and the number of people reported for the rank. The second table uses the same rank within discipline organization to show the discipline as a percentage of average salaries reported by CUPA for the discipline. The third table relates the dollars required for the discipline at NKU to attain parity with CUPA, if the discipline is below the CUPA average. For disciplines at or above the average, a "0" difference shows. In the section with aggregate university-wide data, Table 5 presents both the NKU average and the CUPA national average salaries.

The CUPA all rank discipline means and the averages for the professor, associate, and assistant (tenure track) ranks are weighted to the distribution of

faculty in those ranks at Northern Kentucky University. For example, while the national CUPA report will have data for faculty in the associate professor rank, if the discipline at NKU doesn't have anyone in the rank, that rank is not used to calculate the all rank average at NKU. Each rank with NKU faculty is also weighted by the rank's proportion of faculty at Northern.

The following table provides a reference to the tables in this report that show University-wide data and data for the colleges. Note, again, that faculty from the Chase College of Law are not included in the University-wide data table.

The PDF version of this report has point-and-click links to the tables through the bookmarks in the left frame of the computer screen.

As a brief summary of Northern's faculty in each of the colleges - with the exception of Chase College of Law for which there is only one discipline - Table 1 relates the high and low percentages for NKU's tenured/tenure track faculty in relation to CUPA averages, and the college's average and median.
