

Program Data Point 4. Counseling Program Learning Objectives

In August 2015, the program implemented its system of Key Objective Assessments (KOAs) using a 3-point Likert Scale, with performance ratings of:

- 1: “Below Expectations”
- 2: “Meets Expectations”
- 3: “Exceeds Expectations”

Faculty base their assessments of performance on a variety of factors associated with a course identified as foundational to the pertinent key objectives. The courses in which each standard is evaluated may be found in the tables below, as may the course-specific assignments and activities that provide the basis for the evaluation. Also included are other courses in which the standards are addressed; these cross-curricular assessment points represent ongoing opportunities for faculty to gauge student development according to the standards.

When reading the tables below, please note the numbers represent the mean scores of each assessment point, using the 3-point scale, for the identified semester. Each represents an aggregate of all the students and all the standards assigned to the primary course connected to the objectives. During instances in which two sections of a course were offered, the ratings from both sections were combined into a single score. Cells that have dashes (----) indicate courses not taught that semester. The assignments representing class-specific and cross-curricular assessment appear, as well.

Each KOA will be covered in a pair of tables, one including semesters from Fall 2016 through Summer 2018, and another documenting Fall 2018 through Spring 2020
