

*FULLY VACCINATED - WHEN SHOULD I QUARANTINE OR ISOLATE?

I am experiencing symptoms of COVID-19 **OR** was in close contact with someone who tested positive for COVID-19 within the past 14 days.
WHAT DO I DO?

SYMPTOMS

Symptoms include: fever or chills, cough, shortness of breath or difficulty breathing, fatigue, body aches, new loss or taste of smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea

ISOLATE

at home and contact your healthcare provider for **immediate testing**.

If you do not have a healthcare provider you can contact Health Services (859)572-5650 or visit [Northern Kentucky Health Department COVID-19 Testing site](#).

YOU TEST POSITIVE

ISOLATE until cleared by the Health Department (typically **10 days**).

YOU TEST NEGATIVE

LEAVE ISOLATION but wear a mask indoors in public and monitor your symptoms for **14 days**.

NO SYMPTOMS

GET TESTED 3 -5 days after exposure and wear a mask indoors in public.

YOU TEST POSITIVE

ISOLATE at home and stay away from others until cleared by the Health Department (typically **10 days**).

YOU TEST NEGATIVE

RESUME NORMAL ACTIVITIES.

Please see the [STUDENT COVID-19 FLOWCHART](#) or [EMPLOYEE COVID-19 FLOWCHART](#) for next steps.

***FULLY VACCINATED**-Vaccine recipients are “fully vaccinated” two weeks after they receive their second dose of the Moderna or Pfizer-BioNTech vaccine or two weeks after they receive the single-dose Johnson & Johnson (Janssen) vaccine.

ISOLATION: separates sick people with a contagious disease from people who are not sick.

QUARANTINE: separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick. These people may have been exposed to a disease and do not know it, or they may have the disease but do not show symptoms.
