Fall Opening of the Care Closet @ NKU

Name: Carolyn Noe, Program Director

Unit: Institute for Health Innovation

Date(s) and Time(s): Wednesdays, 11 am – 3 pm, appointment only every 45 minutes with 15 minutes to clean between students

Location: UC 142

Mandatory Training Completed: Yes

Description of Activity (includes number of people on campus): Current students will shop for (free) clothing, accessories, and other supplies in the newly established closet. A volunteer will assist with finding the right sizes and styles for the shopper.

Provisions to Mitigate Risk: Only one shopper and one volunteer may be in the space at one time. Volunteers and shoppers will maintain social distancing by staying 6 ft apart and wearing masks at all times.

Clothing is sanitized before put on display and anything donated will be taken back to the main Care Closet location to be sanitized.

Other Comments:

The Closet will also receive donated clothing at a date later in the semester to be announced. At present the Care Closet is already overflowing with garments, but would like to have the option when they are ready to accept more clothing.

It is important that you open now instead of delaying until later due to the shrinking economy many students will be in higher need of these services.
