Academic Snapshot:
2011-12 through 2016-17
Resource and Workload Measures for Academic Colleges and Departments

Last Refresh: Oct 03, 2017
### Resource Measures

#### Faculty Data

1. Faculty headcount and FTE calculations are reported as of the snapshot figures for fall semesters, taken on November 1 of each year.

2. The U.S. Department of Education’s Integrated Postsecondary Education Data System (IPEDS) allows institutions to report department chairs and other faculty with administrative or other non-instructional duties as either faculty or administrative staff. NKU has historically reported academic chairs, faculty advisors, and academic program directors as non-instructional staff on the IPEDS report. These individuals have faculty appointments at NKU; therefore, in Fall 2014, these positions were moved to faculty on the IPEDS report. For the Academic Snapshot, adjustments were made to fall 2010 through 2013 to add the academic chairs, faculty advisors, and academic program directors to the previous faculty counts. Therefore, the total full-time faculty counts for historical years will not match previously reported IPEDS figures.

3. Part-time faculty headcount in this report includes staff who teach as adjuncts (with the exception of deans), in order to more clearly reflect the number of part-time faculty within each department. Staff who also teach courses are not included in the part-time faculty counts on the IPEDS report, since each employee can be counted in only one category; hence, these figures will differ from the IPEDS reports.

4. Part-time faculty who teach in more than one department have been counted within each department, but unduplicated at the college. When the courses taught are in two colleges, the part-time faculty member is counted in each department and college, but unduplicated at the university level. Therefore, the sum of the departments or colleges for part-time faculty will not always equal the total at the next level.

5. Only full-time faculty with tenure or on tenure-track are included in the tenured/tenure-track record for each department and college. In other words, some part-time faculty, including some full-time staff who teach part-time, have tenure/tenure-track status, but those individuals are not included in this count. The figures here will not match the IPEDS report, which includes part-time faculty with tenure/tenure-track status.

6. Faculty have been grouped by the current academic departments, using the department code from the Human Resources (HR) system for each faculty member’s assignment. For historical data, adjustments have been made to accommodate the current academic departments. For example, part-time faculty who taught in previous semesters in a department within the College of Business that does not currently exist have been moved to the department where the courses taught are currently housed.

7. Full-time equivalent (FTE) faculty calculations have been computed according to the following methodology: All full-time faculty in a department have been counted as FTE = 1. In other words, no adjustments have been made for release times, nor is there an accounting for overloads.
Then, all courses taught by someone other than a full-time faculty (i.e., adjuncts and staff teaching part-time) are assessed, with 12 undergraduate hours calculated for full-time, nine hours used as full-time for graduate level courses, and six hours for law courses. If a part-time faculty reaches an FTE that exceeds 1, the value for that person has been capped at 1. FTE has been rounded to a whole number for the report.

Note: Discussions have begun on utilizing information on the PARs for calculating FTE. Significant training will be needed to ensure consistency in application across all departments and colleges when we are able to move to that methodology.

8. The organizational structure has changed considerably over time. All historical information has been organized under current departments.

**Workload Measures**

**Classification by Major**

1. Student counts by classification reflect fall enrollment, as reported to the Kentucky Council on Postsecondary Education (CPE). Each semester's enrollment is based on census date(s), which is the last day to add a class.

2. Students are counted as an undergraduate or graduate student according to the CPE designation for undergraduate/graduate classification, which may be different than the student’s major. As an example, some students classified as graduate students may be pursuing an undergraduate program.

3. Students with a secondary undergraduate major or a secondary graduate major are included a second time on the designated line in this report. This represents a duplicate count; therefore, the total students by classification will exceed the unduplicated student headcount. On the "All NKU" page, the unduplicated student headcount is the sum of primary undergraduate plus primary graduate. The lists of major codes included under each department and college contain the counts for primary and secondary majors. Therefore, these figures will be higher than other NKU reports that provide an unduplicated student headcount by primary major.

4. The lists of major codes included under each department and college contain the counts for primary and secondary majors. Therefore, these figures will be higher than other NKU reports that provide an unduplicated student headcount by primary major.

5. Majors are grouped by the current academic architecture. As an example, economics majors resided in the department of Marketing, Economics & Sports Business from 2011 through 2014; however, this major was moved to the department of Economics and Finance in 2015, which is where it is reported for all years in this report.
### Student Credit Hours Attempted

1. The student credit hours attempted are reported in a yearly format, as defined by the Kentucky Council on Postsecondary Education (CPE), which starts the year with the summer term. For example, the 2014-15 year includes the summer and fall semesters of 2014 and spring semester 2015. Student credit hours has been rounded to a whole number for the report.

2. The student credit hours attempted are the official totals reported to CPE. Each semester's total is based on census date, which is the last day to add a class. For full academic semesters, the census date is the eighth calendar day. Shorter terms have census dates that occur earlier than the eighth calendar day of that term.

3. Student credit hours (SCHs) are organized by the department of the faculty member teaching the course, as reported in the Human Resources (HR) system. Therefore, SCH totals for departments and colleges in this report will not match other reports that group the SCHs by the department of the course. Note that some courses are missing the faculty name, and some part-time faculty do not have an HR department denoted for the course. Credit hours for courses without faculty or academic department designations will appear under “not assigned.” This includes full-time staff who taught a course for which an academic department was not designated in the HR department field.

4. The academic architecture has changed considerably over time. All historical information for student credit hours has been organized under the current academic departments.

5. The annual mean section sizes have been calculated using the definitions applied in reporting the Common Data Set (CDS). Course counts and enrollments are excluded for distance learning classes (which includes online courses and courses taught at hospital and industry settings); individual instruction, such as dissertation or thesis research, music instruction, or other independent study; co-operative programs; internships; practicums; and all one-on-one classes. Cross-listed courses meeting at the same time and location are counted as one section.
Degrees and Certificates Awarded

1. The degrees and certificates awarded are reported in a yearly format, as defined by the Kentucky Council on Postsecondary Education (CPE), which starts the year with the summer term. For example, the 2014-15 year includes the summer and fall semesters of 2014 and spring semester 2015.

2. The total degrees and certificates awarded are the official counts reported to CPE. Degrees and certificates that may have been conferred after the official reporting date are not included.

3. Students who receive a double major at the baccalaureate level are included on a separate line labeled “double major.” Although double majors are reported to CPE, they are not included on official reports for the total number of degrees and certificates awarded; therefore, the figures reported here are higher than the University’s official counts for total degrees and certificates awarded. Conversely, if a student has earned two or more degrees or certificates, all awards are counted within each respective college and department.

4. In 2013-14, CPE did not allow for the inclusion of institutionally-defined certificates with less than 18 hours for post-baccalaureate certificates or less than 24 hours for post-master’s certificates. However, in 2014-15, CPE requested these certificates to be included in the official counts. This means that 56 institutionally-defined certificates are not included for 2013-14. A list of the institutionally-defined certificates awarded in 2013-14 is available on the Institutional Research – Data Center, under Management Information Reports (MIR), Section 1.

5. The academic architecture has changed considerably over time. All historical information has been organized under the current academic departments.

Outcome Ratios

1. Outcome ratios are provided for each college and department, using the data provided in the table. The FTE values and Credit Hours values displayed on the report have been rounded to whole numbers, while the values used in the outcome ratios calculations have not been rounded. The precise values are used, and the outcome ratio result is then rounded to the nearest tenth. The “All NKU” page displays the ratios for the University.

2. On each college page, the first outcome ratios section displays values for that college, and the second section displays the comparative information for the University.

3. On each department page, the first outcome ratios section displays values for that department, and the second section displays the comparative information for the college.
