

As a **radiologic technology program accredited by the JRCERT**, assessment of program effectiveness is a continual process. As required by the JRCERT, the following program effectiveness data is provided to assist prospective students in their decision-making process:

Program Completion Rate: The percentages reported here indicate the number of students who completed the associate degree program as compared to the number who started it. The program's benchmark for this assessment is that 75% of those students who start the program will graduate within a reasonable time frame (150% of stated program length).

Class	Completion Rate	Benchmark	Results
2015	23/27 = 85.2%	+ 10.2%	Above benchmark
2014	23/28 = 82.1%	+7.1%	Above benchmark
2013	25/28 = 89.3%	+14.3%	Above benchmark
2012	22/29 = 75.9%	+.9%	Meets benchmark
2011	23/27 = 85.2%	+10.2%	Above benchmark
5 Yr Average	116/139 = 83.5%	+8.5%	Above benchmark

ARRT Certification Exam Pass Rate: Students who graduate from an accredited radiologic technology program are eligible to sit for the American Registry of Radiologic Technologists' (ARRT) national certifying examination. NKU graduates are consistently very successful on this exam as indicated by the pass rates below.

Year	# that took the exam	# that passed on 1st attempt	Pass Rate
2015	23	22	95.7%
2014	23	23	100%
2013	25	24	96%
2012	22	21	95%
2011	22	22	100%
Average Pass Rate	115	112	97.4%

Job Placement Rate: This report represents the number of students who gained employment in radiologic technology within twelve months of graduation as compared to the number of graduates who were actively seeking employment in the field. The benchmark for this assessment is 75%.

Class	Employed within 12 mo.	Benchmark 75% placement within 12 mo.	Results
2015	23/23 = 100%	+25	Exceeds benchmark
2014	22/23 = 95.7%	+20.7	Exceeds benchmark
2013	20/25 = 80%	+5.0	Exceeds benchmark
2012	18/22 = 82%	+6.8	Exceeds benchmark
2011	19/22 = 86%	+11	Exceeds benchmark
<i>Average</i>	<i>102/115= 88.7%</i>	<i>+13.7</i>	<i>All classes during this period exceed benchmark</i>
