A few things I can take away from these two years are the ability to manage and lead a group of people to a common goal and seeing the results of your work makes it all worth the while. Messer has taught me many technical skills and experiences that I am able to take back to my classes and apply in my studies. Whether it is problem solving an issue on a site or being able to get and do the physical work myself, I am grateful and excited for my future with Messer.

HOLDEN YODER

CO-OP CONSTRUCTION MANAGEMENT

Seeking Co-Op for overall management of construction projects. Each Co-Op role is strategically designed and custom tailored. The Co-Op partners and works under the tutelage of a Senior Project Supervisor and acts as a role model and supports the integrity of Prus’ Core beliefs: safety, quality, production and relationships. The Co-Op will be a part of building some of Cincinnati’s most iconic landmarks!

PROJECT ENGINEER CO-OP - CINCINNATI

Seeking Project Engineer Co-ops with a passion for commercial construction to join our team. The primary responsibility of this position is to assist the Project Engineer and Project Manager in delivering successful projects through a safe work environment, quality construction, effective LEAN planning and scheduling, cost management, collaboration with project stakeholders, and superior customer service. The ideal candidate will possess a desire for growth, long-term thinking, relationship-building skills, and a growing familiarity with the construction industry.

LEARN MORE & APPLY

Come experience life as a General Contractor. You will be paired with a Project Manager who serves as your mentor. You will be given opportunities to work directly in various aspects of project management, including processing submittals and take-offs, assisting with preparing budgets, attending job site/owner meetings, and much more. We are committed to exposing you to real life situations in the field and in the office. Throughout your semester with us, you will be involved in training sessions, jobsite tours, and learning about how we ensure safety is a number one priority. We give you the opportunity to gain hands-on experience, the kind that you can only learn by doing.

Intern Spotlight
Shanoah Moore

"I have had a wonderful experience working with Triversity. The culture and everyone on the team were very welcoming. When I first began my co-op, I had so much to learn about construction. Triversity has helped develop and grow my skills tremendously. Overall, Triversity is a great company and I look forward to continue working with them in the future."

Estimating & Project Management or Operations

Triversity Construction matches co-op participants based on academic area, experience, and interest so you get the chance to explore a broad cross section of construction experiences.

Co-Ops and Job Opportunities for Summer and Fall 2024

Building Crafts, Inc.

Building Crafts is looking to provide a full time cooperative education experience in estimating, office construction project management, and onsite construction project management. The Co-Op will either work in our office with our estimating team and project managers, or at a construction site with a construction superintendent. Building Crafts is located in Wilder, KY.

Project Engineer

The Thomas J. Dyer Company is a full-service mechanical and plumbing company that’s performed best-in-class installation, process and industrial piping and service across the country. TJ Dyer is seeking a Project Engineer who will be responsible for assisting the project manager and project team with project documentation and control, job cost accounting, scheduling, and construction supervision efforts. In order to be successful, you should feel comfortable taking on many tasks that require various skills, and appropriately prioritizing those tasks' completion.

Co-op/Intern Cincinnati, Ohio

To provide a varied and applicable work experience with personal soft skills growth for college students participating in a co-op education or internship program by providing a unique and well-rounded experience in field and office positions. A Co-op/Intern’s supervisor will depend on their semester assignment.

Construction Management Co-op

Our mission at Model is to positively transform communities. Our co-ops shall always conduct themselves in a courteous, knowledgeable, and professional manner. A co-op should be prepared to help the Model staff with project Safety, Schedule, Quality, and Cost awareness.
