

Construction Management Placement Data

Spring 2012:

90% of graduates were employed in their field of study within 6 months of their graduation. This relatively low number can be primarily attributed to the economic downturn and its direct effect on the construction industry. We expect this number to increase as the general economic conditions improve. Median starting salary was \$39,000, with the lowest starting salary reported as \$31,000 and the highest as \$49,000.

Spring 2013:

94% of graduates were employed in their field of study within 6 months of their graduation. Median starting salary was \$43,000, with the lowest starting salary reported as \$33,000 and the highest as \$51,000.

Spring 2014:

95% of Graduates were employed in their field of study within 6 months of their graduation. Median starting salary was \$45,000, with the lowest starting salary reported as \$35,000 and the highest as \$57,000. We expect full placement by Spring 2015 due to the increasing demand on construction management graduates to fill vacant positions in the construction industry resulting from an improved economic environment and a retirement within the ranks of senior construction personnel.

For the past 5 years, repeat employers have consistently included:

- 1- Turner construction (field Engineers, Schedulers, Estimators)
- 2- Messer Construction (Field Engineers, Schedulers, Estimators)
- 3- Danis Construction (Assistant Project Manager)
- 4- Fisher Homes (Superintendent)
- 5- Drees Homes (Field Engineer)
- 6- Alan Schmidt homes (Estimator)
- 7- HGC Construction (Field Engineer)
- 8- Reese Campbell (Field Engineer, Safety Engineer)
- 9- KLH Engineering (Field Supervisors)
- 10- Grote Enterprises
- 11- Skanska
- 12- Monarch Construction
- 13- Mass electric
