Assignment #8
CSC 301-001
Fall 2015

This is a continuation of Assignment #7.
1. As in Script 3.5 on page 87, we want estimates.php to both display and handle the form.
2. Open both estimates.php and painter.php in your editor.
3. In estimates.php, you need to add an “if statement” to check if this is a form submission. These are lines 7 and 27 of Script 3.5
4. You will copy code from painter.php into estimates.php. This is the code that tests whether each of the fields is empty, and also the code that decides whether to display the contents of the form fields. Remember that the code you have copied is PHP not HTML. 
5. Change the test for Zip Code from !empty to is_numeric. See line 11 of Script 3.5.
6. Copy the class .error from painter.php to painter.css.
7. Change the <form> tag action in estimates.php to submit the form back to estimates.php.
8. Upload your Pasha folder to csweb.hh.nku.edu.

This is what your output look like if the form is successfully submitted.

This is what you output should look like if you forget to enter a zip code.
9. Make the Name, Email, Zip Code, and City sticky fields. (See line 34 of Script 3.6 on page 93.)

10. Make the Type of Job sticky as follows:

```php
<textarea name="myJob" id="myJob" rows="2" cols="20">
<?php if(isset($_POST['myJob'])) echo $_POST['myJob']; ?></textarea>
```

11. Make the State pull-down menu sticky. (See lines 41-44 of Script 3.6 on page 93.) To do this, add the following code.

```php
foreach ($states as $value) {
    echo "<option value=""$value"">$value
    if(isset($_POST['myState']) && ($_POST['myState'] == $value))
        echo 'selected="selected"';
    echo "->$value</option><n" ;
}
```

12. Upload your Pasha folder to csweb.hh.nku.edu.

13. **Save this version of your Pasha folder.** We will need it for Assignment #23.
This is what your output look like if the form is successfully submitted.

To see what your output should look like, go to
http://csweb.hh.nku.edu/csc301/frank/pasha8/estimates.php

When you have completed this assignment, email the link to estimates.php to frank@nku.edu with “Subject: CSC301 Assn#8”.
