In this example we will demonstrate how to obtain a box plot of a set of sample data. The data for this example again comes from Chapter 3, Section 1, Exercise 33, on page 119.

To obtain a box plot of the data use:

Graphics > Boxplot
Select Column: [Weight in Grams]
Next;
✔ Use fences to identify outliers
Next
Title: [Boxplot of M&M Weights (grams)]
Create Graph!

For reference, here is the five number summary

(Min, Q1, Median, Q3, Max)
(.76, .85, .88, .90, .94)
